Task: to localize and segment anatomical structures in medical image data. VISCERAL provides training data and performs benchmarking of algorithms.

Data
15 x whole body CT
15 x whole body MR T1
15 x abdomen/thorax contrast enhanced MR T1
15 x abdomen contrast enhanced CT

Annotations
890 segmented anatomical structures
2420 anatomical landmarks

Schedule
Opening: January 2014
Intermediate evaluation: during the VISCERAL ISBI Challenge end of April 2014
Closing: benchmark virtual machine submission on June 16th 2014
